Project Description

This project involved the construction of storm sewers, sanitary sewers and appurtenances. Work items included new sewer and water main work, new drainage system including catch basins, manholes, house connections, new asphalt pavement, new curb and sidewalks.

Competitive Advantages

KAG Engineering, PLLC [KAGE] provided a Senior Construction Inspector that was responsible for preparing field cards, tap cards and in service sheets for the new water main work, reviewing the inspectors' daily reports and entering the quantities into the payment, reviewing contractor's documents submitted every month before payment submissions to DDC and reviewing specifications for the work items as required for the project.

Project Duration

August 2014 through September 2015
