Project Description

This project involved the groundbreaking agreement between the NYC Department of Environmental Protection and the NYS Department of Environmental Conservation to reduce combined sewer overflows [CSO] using a hybrid green and grey infrastructure approach. This innovative approach involved green roofs, blue roofs, bioswales, rain gardens and other types of green infrastructure.

Competitive Advantages

KAG Engineering, PLLC [KAGE] provided a Community Construction Liaison that was responsible for the coordination between the project and the community including the community boards, Business Improvement Districts garden associations and the general public.

Project Duration

May 2015 through May 2018
